GRIGIO GREY	POL4 BOOT
BLU BLUE	POL5 CNF1
VIOLA/GRIGIO PURPLE/GREY	TENSIONE PROG. PROG. VOLTAGE
MARRONE BROWN	RESET

BOSCH EDC17CP04 IROM TC1796 VAG

BOOT CONNECTION

Connect the GREY wire of the cable F32GN037C as described here below :

COLORE FILO WIRE COLOUR	DESCRIZIONE DESCRIPTION
GRIGIO GREY	POL4 BOOT

BOSCH EDC17CP04 IROM TC1796 VAG

METAL POSITIONING FRAME CONNECTION

For the metal positioning frame connection is required the F34DM011 adapter. Connect the boot pin to the pad n.10 of the soldering lay-by pins then verify that the switch BOOT present on the F34DM011 is set in position ON.

A different solution is to connect the BOOT wire directly to the orange BOOT clamp on the F34DM011 adapter. Check that the yellow BOOT jumper is set in ON position. Connect then the flat cable to the Trasdata.
