BLU BLUE	POL5 CNF1
VIOLA/GRIGIO PURPLE/GREY	TENSIONE PROG. PROG. VOLTAGE
MARRONE BROWN	RESET

ECU CONNECTOR

To the 5 power feeding pins you can connect both wires red and orange, they both have 12 Volt signal.

WARNING: after placing back the ECU in the vehicle it is possible that the vehicle has lost some self adaptive parameters (e.g. idle RPM). With warm engine temperature is then necessary to rev up to full scale 3 times and check that the car runs fine.
